## Company Profile

**Industry Sector:** Population Health.

**Company Overview:** InquisitHealth helps patients with poorly-controlled chronic diseases make significant improvements in their health. We utilize the **power of peer mentoring** to guide patients through *structured programs* that (a) reinforce disease knowledge and (b) help implement key self-management behaviors.

Multiple randomized clinical trials and our commercial programs have demonstrated the efficacy of 1-on-1, peer-to-peer mentoring to engage patients and drive significant, measurable improvement in health outcomes.

**Target Markets:** Health insurers, self-insured employers, self-insured unions, and at-risk medical providers (ACOs, DSRIP, MSSP, etc.).

## Key Value Drivers

**Technology\*:** HIPAA-compliant web- and mobile-based technology platform to (a) deliver structured programs to patients, (b) manage peer mentors, and (c) interface with existing clinical workflows within clinics, hospitals, and health insurers.

**Competitive Advantage:** InquisitHealth provides a full-service solution (encompassing both the technology and a trained workforce of peer mentors) that engages patients and delivers improved health outcomes by inspiring sustainable behavior change.

**Plan & Strategy:** Conduct randomized clinical trials to develop peer-reviewed evidence base. Continue deploying our intervention commercially to demonstrate efficacy at scale.

## Management

**Leadership:** Ashwin Patel, MD PhD serves as Chief Medical Officer. Brijesh Patel serves as Chief Technology Officer. Our Board Director is Jim Foy, former CEO of St. John's Riverside Hospital System (NY).

**Scientific Advisory Board:** Our Advisors include endocrinologists, pulmonologists, primary care physicians, PhD psychologists, and researchers from top Universities across the country including UPenn, UCSF, UMich, UNC, Wash U and others.

## Product Pipeline

**1. Diabetes:** Deployed commercially + conducting 2-arm randomized clinical trial.

**2. Pediatric Asthma:** Deployed commercially + conducting 2-arm randomized clinical trial.

**3. Pre-Diabetes:** Deployed commercially + conducting non-randomized pilots.

**3. In Production:** Programs providing peer-to-peer support for HIV patients, chronic kidney disease/ESRD patients, CHF caregivers, and mental health patients.

**Keywords:** coach, mentor, population, HIV, diabetes, asthma, pre-diabetes, behavior change
