
iEdison Release 3.02.02.005

Release Notes

Summary

This release includes a critical defect fix.

Fix

Problem:

When an Extramural User uploads a new Invention Disclosure, Confirmatory License, or Government Support Clause after a previous rejection of the document by the Government, an error is displayed that will not allow the Extramural User to upload a new document. After the user clicks "Submit" the second time on either the Modify Invention Report or Modify Patent Report screens, an error is given that says, "If you enter Reject Comments, you must enter an associated Reject date. (ID: 40029)". This validation should only occur when a Government User is entering rejection comments for a document.

Resolution:

iEdison only applies the validation that reject comments can only be entered when there is a reject date when the user is a Government iEdison User. Extramural Users no longer receive the error message and can upload a new document if a previous document was not accepted.
