# NIH eRA Commons IAR Version 2.7.4.5 Release Notes

## IAR Module Bug Fixes

The following bugs were fixed within the Commons Internet Assisted Review (IAR) module.

### **Internal User Access to the IAR module**

In previous versions of Commons, internal IAR users (SRAs and GTAs) were unable to access the IAR module if their session was timed out or if they did not use the **Log-out** link (at the top-right corner of the interface) to exit Commons. This bug has been corrected, allowing internal users to access the IAR module after exiting (or being timed out of) a previous Commons session.

### **Internal User Access to the IAR Menu**

When logged into Commons, internal users were previously unable to access the **IAR Menu**. This bug has also been fixed.
